GREEN TEA. A MEDICINAL PLANT FOR CENTURIES.

The natural products of *Camellia sinensis*, commonly known as green tea, originated in ancient China about 5000 years ago. With the increasing consumption of tea in Western countries, interest in its health benefits has since risen significantly.

Its extracts are known for their invigorating properties that refresh both body and mind. They help to promote balance in everyday life and strengthen the body's natural defenses. They also contribute to a harmonious balance, bringing calm to hectic days and helping to create a sense of inner balance.
