ADEK VITAMINS. FOR THE IMMUNE SYSTEM.

Thanks to a perfectly balanced combination of vitamin A and vitamin D3, also known as the “sun vitamin”, this complex supports our body’s natural defenses by contributing to the normal functioning of the immune system.

In addition, vitamin D3 and vitamin K2 contribute to the maintenance of bones. Vitamin D3 also contributes to the maintenance of teeth and normal muscle function. At the cellular level, vitamin D3 plays a role in cell division, while vitamin E helps to protect cells from oxidative stress. Moreover, vitamin A is involved in cell specialization and contributes to the maintenance of normal skin and vision.
